

July 13, 2026

2026 IEEE Energy Conversion Conference and Expo (ECCE 2026) Technical Program Committee acknowledges the contribution of: ***Sudhakavya Bodapati Venkata.***

As a reviewer for the following papers:

Paper ID:	1363
Track ID:	Assessment of Generator Shaft Torsional Fatigue Due to Ai Data Center Load Variability
Paper ID:	1423
Track ID:	Design of Vector Proportional-Integral (VPI) Controllers in Active Power Filters
Paper ID:	1431
Track ID:	Conduction Loss Reduction Method Based on Third Order Harmonic Injection for Dual Active Bridge in Solid State Transformer
Paper ID:	1450
Track ID:	Mechanism Analysis of DC-Voltage Timescale Dynamics Generation Dominated by Current Control in a High-Proportion DFIG-WT System
Paper ID:	1932
Track ID:	Aging and Efficiency Aware Multi-Objective Scheduling for PV-BESS Under PV and Load Forecast Uncertainty
Paper ID:	2439
Track ID:	An Expert-Informed Labeling Framework for Supervised Power Quality Anomaly Detection on Real Building Data
Paper ID:	2565
Track ID:	Data Center Electric Power Estimation Based on Generative AI Synthetic Data for System Design and Grid Integration

Thank you,

Navid Zargari
ECCE 2026 Technical Program Chair
